

# The byer network for a climate neutral transport infrastructure sector

Bodil Sandén – Collaboration and Innovation Leader at InfraSweden

Med stöd från

**Infra  
Sweden**

# InfraSweden in short

- One of 17 National Strategic Innovation Programs (SIP)
- Focus on stimulating innovation in the transport infrastructure sector
- Program goals: A sustainable transport infrastructure that supports the transition to Agenda 2030 and climate neutrality in 2045
  - Increased sustainability
  - Competitive innovations for transport infrastructure
  - An open, dynamic and attractive sector
- Our activities:
  - Open calls for innovation projects
  - Strategic projects
  - Innovation competitions
  - Innovation coaching and competence development
  - Seminars, webinars & workshops

# About our buyer network

## The overall purpose of the network

- Accelerate development towards a climate-neutral transport infrastructure sector
- Procurement that promotes innovation and sustainable development
- Strengthened competence and innovativeness

## Focus Areas

- Procurement
  - Climate criteria in procurements
  - Buyer courage
- Collaboration
  - Early Supplier and Contractor Collaboration.
  - Innovation in collaboration
- New materials and calculation of alternative choices
- Organization:
  - To lead in change
  - "The red thread": From the overall strategy to actual operations in projects
- Provision and spread of good examples: National and international

# About our buyer network

- Not only buyers! State agencies, contractors, suppliers, consultants, researchers, sector organisations etc.
- Over 100 people have been engaged, of which about 30 constitutes the core of the network
- So far: Nine network meetings and about 20 innovation team meetings
